Introduction

Homeowners and renters remodel, redesign, and restructure their homes for a variety of reasons. This report takes a deep dive into why a homeowner remodels, the outcome of taking on projects, and the increased happiness in the home once a project is completed. It also contains:

- The top cost recovery for remodeling projects, as estimated by members of the National Association of the Remodeling Industry (NARI)
- The demand of each project is likely to have for buyers, according to REALTORS®
- How much REALTORS® estimate that homeowners can recover on the cost of the projects if they sell the home.

Americans spent an estimated \$603 billion in 2024 on remodeling their homes.¹ Among NARI members, 42

percent found a greater demand for contracting in remodeling work during the last two years. Fifty-seven percent of NARI members cited that the scale of the projects increased, resulting in either a larger project or the remodeling of more than one room in the last two years.

This matches what REALTOR® conveyed: 46% of home buyers are less willing to compromise on the condition of the home when purchasing.

For the purpose of costs collected, NARI members were told to expect the home to be a 2,300 square foot house—the average size according to U.S. Census data and the house is a post-1978-built home with no hidden issues. To ensure the most applicability, projects and materials represent standard or typical quality; a few projects feature “better-quality” materials. But there are no top-of-the-line projects.

A man in a yellow shirt and jeans is on a wooden ladder, painting a wall green with a roller. A woman in a red shirt and jeans is standing on the floor, holding a white bucket and a roller, looking up at the man. The room has a white wall with green paint splatters, a window on the left, and a radiator on the bottom left. The floor is covered with a protective sheet.

Top Joy Scores and Cost Recovery

Top Projects

There are numerous approaches to remodeling projects for homeowners and even more methods to analyze the projects' successful outcomes.

NAR calculated a Joy Score for each project based on the happiness homeowners reported with their renovations. Forty-three percent feel happy, and 38 percent feel satisfied when they see their completed project, with a typical Joy Score of 8.2. There were three projects that received a perfect Joy Score of 10: added primary bedroom suite, a kitchen upgrade, and new roofing.

REALTORS® provided an estimate of the likely dollar value each project would add to the house at resale. NAR calculated a Recovered Project Cost percentage by comparing that dollar value to the estimated cost of each project provided by NARI members. For example, the highest percentage cost recovered on a project was 100% for a new steel door.

Top Joy Score For Remodeling Projects

Top Cost Recovery For Remodeling Projects

A kitchen under renovation. The room features light-colored wooden cabinets and a central island. The island has a wooden countertop and a dark base. The floor is covered in brown paper, and blue painter's tape is visible. A yellow step ladder and a level are in the background. The ceiling has recessed lighting and a white cord hanging down. The text "REALTOR® Perception of Demand" is overlaid in the center.

REALTOR® Perception of Demand

REALTOR® Perception of Demand

REALTORS® often suggest a homeowner take on a project remodel before attempting to sell their home. The top projects REALTORS® recommended potential sellers take on are painting the entire home, painting one room, and new roofing.

Since 2020, REALTORS® have seen home preferences shift. The top remodeled areas NAR members have seen an increased demand for in the last two years have been kitchen upgrades, new roofing, and a bathroom renovation.

Consumer Approaches to Remodeling

Consumer Approaches to Remodeling

Why Undertake Remodeling:

When consumers remodel, it is to upgrade worn-out surfaces, finishes, and materials (67 percent); to improve energy efficiency (19 percent), it is time for a change (18 percent), and because they will be selling in the next two years (18 percent).

Dollars and cents:

Housing affordability and the rise in mortgage rates have been pondered to be a motivating factor to remodel one's home. The majority of consumers, 89 percent, reported housing affordability was not a deciding factor to remodel. However, for nine percent of consumers, the rise in home prices/mortgage rates was a motivating factor to remodel as they did not or could not move.

To pay for the project, 54% of consumers used a home equity loan/line of credit to remodel, 29% used savings, and 10% used credit cards.

Primary Reason for Completing the Remodeling Project

Impact of Housing Affordability on Decision to Remodel

How Project Was Paid For

Consumer Approaches to Remodeling

Who did the work?

Twenty-nine percent of the owners hired a professional for the whole job, 24 percent hired the labor but purchased the materials, and 24 did the entire project themselves. Twenty-three percent contributed some do-it-yourself (DIY) labor. Some projects, such as painting, are more likely to be done DIY.

Consumers were split on whether the project came in on time, with 37 percent reporting it took the same amount of time, 31 percent more time, and 31 percent less time.

Completed in Time as Planned

Consumer Approach to Remodeling

Remodeling Result:

Twenty-eight percent of owners report that the single most important result from remodeling is better functionality and livability, 23 percent report durable and long-lasting results, materials, and appliances, and 23 percent report beauty and aesthetics.

Most consumers are pleased with the overall result, and 46 percent would tackle the project the same way, while 31 percent would make a few different choices, such as finishes or materials. After remodeling, 64 percent of owners have a greater desire to be in their home. Forty-six percent have increased enjoyment in their home.

Fifty-five percent feel a major sense of accomplishment when they think of their completed project. If cost was not an issue, 92 percent would want to remodel more areas of their home.

Methodology

Survey of Consumers Who've Completed Remodeling Projects:

In Winter 2024, the homeownership site HouseLogic.com surveyed consumers about the last remodeling project they undertook. A total of 806 respondents took the online survey. The Joy Score was calculated by combining the share who were happy and those who were satisfied when seeing their completed project and dividing the share by 10 to create a ranking between 1 and 10. Higher Joy Scores indicate greater joy from the project.

National Association of the Remodeling Industry Cost Survey:

In the summer of 2024, NARI emailed a cost survey to its member companies. A total of 177 responses were received.. Respondents were asked to take the following into consideration: "For each project, please assume the house is in good condition. There are no surprises that will impact the cost. Generally, assume a 2,300 sq. ft. house--the average size according to U.S. Census data. The house is a post-1978-built

home with no hidden issues. To ensure the most applicability, projects and materials represent standard or typical quality; a few projects feature "better-quality" materials. But there are no top-of-the-line projects."

National Association of REALTORS® Value Survey:

In the summer of 2024, NAR emailed the remodeling project survey to a random sample of 100,000 members. A total of 4,005 responses were received. The survey had an adjusted response rate of 4.0%. Respondents were asked to take the following into consideration: "Based on a survey from the National Association of the Remodeling Industry, we have included the median cost of each professional remodeling project. Generally, assume a 2,300 sq. ft. home based on U.S. Census data.

The primary measure of central tendency used throughout this report is the median, the middle point in the distribution of responses to a particular question, or, equivalently, the point at which half of the responses are above and half are below a particular value.

National Association of REALTORS®

The National Association of REALTORS® is America's largest trade association, representing more than 1.4 million members, including NAR's institutes, societies and councils, involved in all aspects of the real estate industry. NAR membership includes brokers, salespeople, property managers, appraisers, counselors and others engaged in both residential and commercial real estate.

The term REALTOR® is a registered collective membership mark that identifies a real estate professional who is a member of the National Association of REALTORS® and subscribes to its strict Code of Ethics.

Working for America's property owners, the National Association provides a facility for professional development, research and exchange of information among its members and to the public and government for the purpose of preserving the free enterprise system and the right to own real property

NATIONAL ASSOCIATION OF REALTORS® RESEARCH GROUP

The Mission of the NATIONAL ASSOCIATION OF REALTORS® Research Group is to produce timely, data-driven market analysis and authoritative business intelligence to serve members, and inform consumers, policymakers, and the media in a professional and accessible manner.

About NARI

The National Association of the Remodeling Industry, or NARI, provides residential remodelers with tools that enable them to perform at a higher level. NARI members' annual sales are nearly three times the industry average because of the knowledge, networking and support that they receive as members. In addition, NARI connects homeowners with its professional members, so consumers have a positive remodeling experience with a professional, qualified remodeler. NARI members pledge to follow the nation's strictest code of ethics for remodelers so homeowners can feel confident that their remodeling job will be done right when they hire a NARI member. NARI's website, remodelingdoneright.com, contains a searchable list of NARI members that homeowners can use to find a NARI remodeler near them.
