This is not an offer to sell, or solicitation of offers to buy, the condominium units in the state of NY or NJ, or any jurisdiction where such offer or solicitation cannot be made. Stated dimensions are measured to the exterior face of exterior walls and to the exterior face of walls adjoining corridors or other common elements. This method of measurement varies from, and is larger than, the dimensions that would be determined by using the observation and the addition of the "fair" and "trim" in the Declaration which generally only includes the interior space between the perimeter walls and includes structural components. Note that measurements of rooms set forth on this floor plan are generally taken at the greatest points of each given room (as if the room were a perfect rectangle), without regard for any columns or irregularities. Accordingly, the area of the actual room will typically be smaller than the product obtained by multiplying the stated length times width. All dimensions are approximate and may vary with actual construction. All floor plans and development plans are subject to change.
